EDUCATION

National University of Singapore	Singapore, Singapore
MA (by research) in Industrial Design (Human-Computer Interaction)	08/2025-05/2027
Advisor: Gabriel Lipkowitz	
Tongji University	Shanghai, China
BEng in Industrial Design (Media and Communication Design Track)	09/2021-07/2025
Advisor: Zhejun Liu, Yiyun Chen and Jie Wu	
The Hong Kong Polytechnic University	Hong Kong, China
Exchange Program, BA in Interactive Media (Interaction Design)	01/2024-05/2024

RESEARCH EXPERIENCE

LLM-Assisted Cross-Platform Game Porting Across Heterogeneous Engine Architectures Study	
<i>Independent Research</i>	08/2025-01/2026
Investigated the capability of LLMs in game porting (Unity C# → native Swift/iOS frameworks). Conducted empirical analysis of LLM failure modes in cross-engine software migration workflows.	
AI-Assisted Image-to-Gaussian-Splatting Pipeline Study for Disaster Simulation	
<i>Independent Research</i>	08/2025-present
Developed an AI-assisted pipeline that reconstructs immersive Gaussian Splatting scenes from image inputs for rapid disaster simulation prototyping. Research focus on human perception of AI-generated environments.	
Gesture-to-Gamepad Interaction Study for VR Gameplay	
<i>Independent Research</i>	03/2026-present
Developed a VR interaction pipeline that maps hand gestures to virtual gamepad controls, enabling PC games to be played through pure hand interaction in VR. Prepared qualitative user studies and interviews focused on usability, embodiment, and player experience in VR pure hand interaction systems.	
XR-Based Stroke Rehabilitation System with Haptic Gloves	
<i>Research project in collaboration with startups</i>	09/2025-present
Collaborated on an XR rehabilitation platform integrating haptic glove interaction for upper-limb rehabilitation and motor recovery training.	
AR-Based Medical Shift Simulation System for Clinical Training	
<i>Research project in collaboration with Keio-NUS CUTE center/NUH</i>	01/2026-12/2026
Developed an AR simulation platform for medical shift-training scenarios aimed at supporting immersive clinical education workflows.	

INTERNSHIP EXPERIENCE

Tencent Technology (Shanghai) Co., Ltd.	07/2024-01/2025
<i>Game Designer of IEG, Aurora Studios, A2 Studio</i>	
Contributed to combat system design, BOSS AI behavior development, faction design, and dungeon content production for the MMORPG PC game Moonlight Blade .	
METEK GAME (Shanghai)	04/2024-06/2024
<i>Game Designer of E-Lab</i>	
Contributed to the development of an unannounced WeChat mini-game, including gameplay documentation, world-building, system design, art collaboration, and gameplay testing.	

SKILLS

Computer Proficiency: MS Office, C#, C++, Swift, Python, HTML/CSS, Adobe series, Xcode, Unity, UE, Blender, Maya, 3DMax, GitHub, AI local deployment, Server deployment
Language Proficiency: Mandarin (native); English (IELTS: 7)
